

How to change the world

By Samantha Ingram

If I were to change
① the world I would start
with picking up litter and
throwing it away. To stop

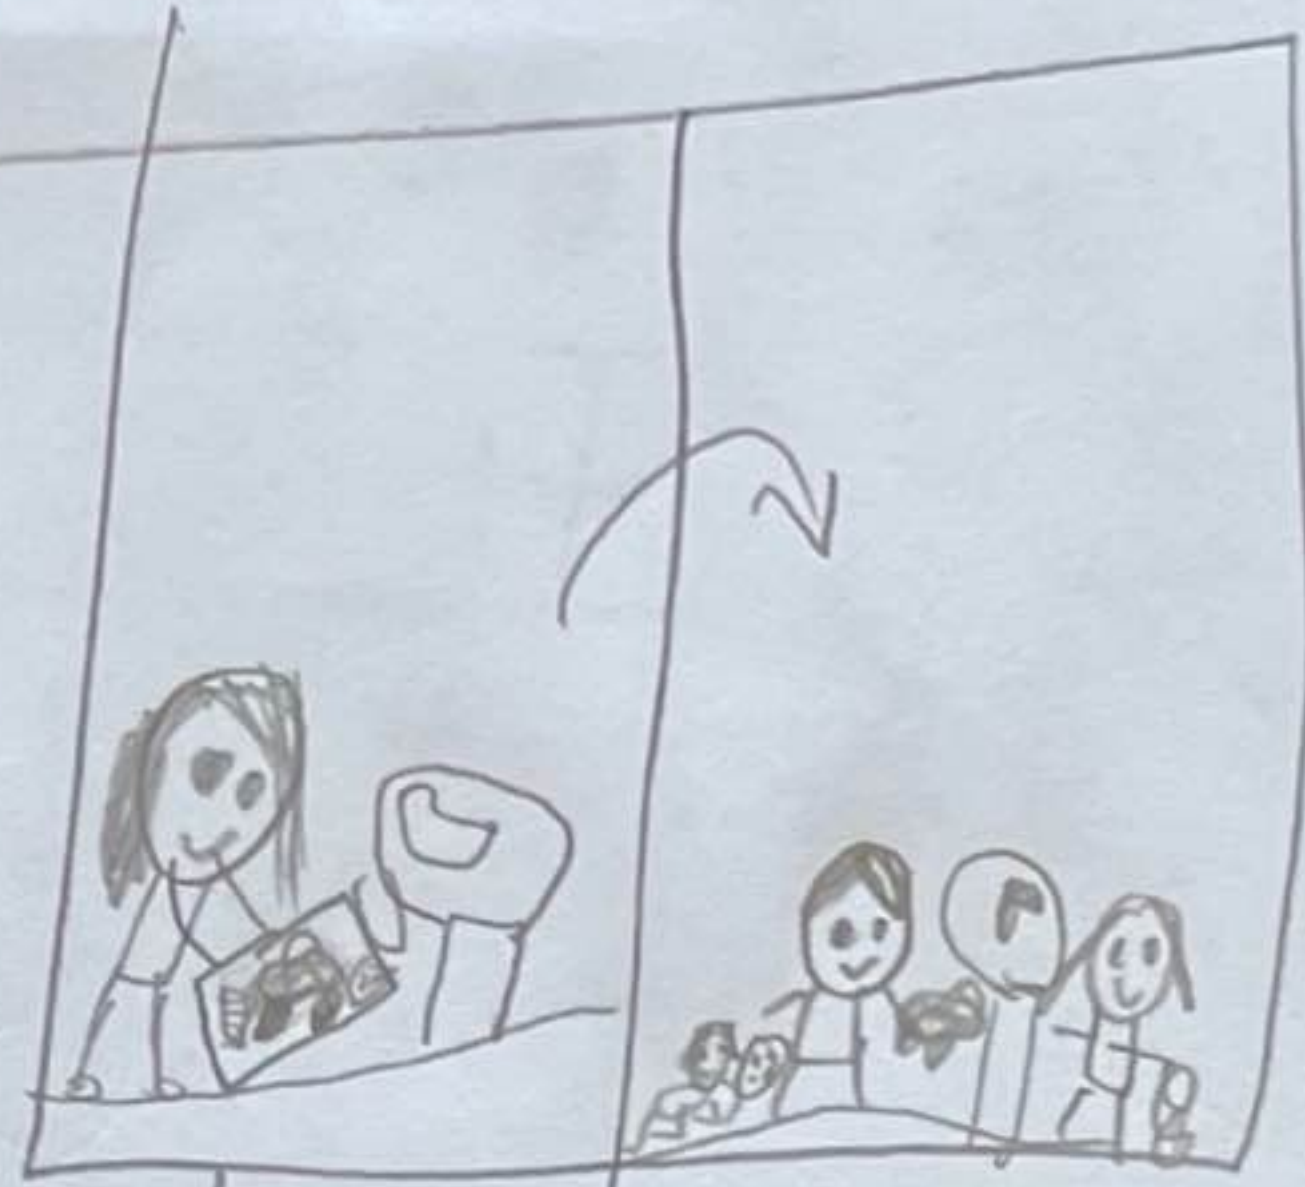

litter even more I
would tell every body I know to
try not to litter and maybe
good friends could even help me
pick up litter

Stop Litter

If I stopped pollution it would
② different I could make a car definitely be
not pollute. I could make factories ^{that} ~~do~~ ^{does} in a
different way so that they do not pollute.
And if you have a car that pollutes maybe
try not to drive as much.

Stop Pollution

I would help the world
③ by donating to poor people then the poor people will be happy. If I donated to a kid at least what I mean is donate toys to kids.
Donate to poor people

If I recycle the world
④ would be much happier because if you throw something that should be recycled in the trash then it would go to the dump which is not helpful.

Recycle

~~How to stop corona virus~~   

⑤

Have you heard of corona it
is the worst I had
to skip gymnastics which
I love so much ~~and~~
and wearing masks ~~is~~ is
the worst. Here are
a few ways to get
rid of it you could
get the vaccine you
know five and up
people can get it now
or wear a mask and
you could even possibly

stay home for a few
days so you don't get
corna and always wash your
hands after you sneeze or
~~cough~~ cough in your hands
or go to the bathroom. you
could get sick ~~if~~ if you eat
to much candy and if you
get sick it could get worst
and if you happen to get corna
tell a parent and stay home
your whole family should stay home

if you get corna. now you get
it corna is the worst

so be careful and don't

go near pepole ~~who~~

who have it. ~~END.~~

~~By Samantha Ingram~~

If I planted trees the
world would have less pollution
and more air. trees can also

⑥ stop earthquakes because its

leaves that fall down
rain so the earth will cover
uneaven and does not get so
trees roots for another reason the
the earth will also stop
from being uneaven

Plant Trees
